

BEYOND™

Kentucky Bluegrass

Delivers turf performance above-and-beyond many popular varieties with excellent disease resistance, density, color, and the ability to crowd out *Poa annua*.

In university trials in New York, New Jersey, and Massachusetts, Beyond ranked among the top Kentucky bluegrasses against *Poa annua*. Beyond holds up under sports traffic. In vigorous slapping-action wear trials in New Jersey, Beyond scored among the toughest, most resilient varieties. Beyond will be ready for spring performance because it resists winter diseases like *Microdochium* pink snow mold, and is one of the best Jacklin varieties for spring density.

Key features

- Dark Genetic Color
- Good Shade Tolerance
- Excellent Spring Density to Crowd Out Weeds

Resists *Poa annua*

Excellent Density

Heat Tolerant

Technical Information

Applications

Beyond is an elite Kentucky bluegrass that will perform beautifully across a range of climates and management regimes - from golf courses in the transition zone to athletic fields in the cold Northern regions. Beyond can tolerate mowing heights from .5 in. to 3 or more, but performs best between .5 and 2 in. Beyond performs well by itself, or in blends with other Jacklin Kentucky bluegrasses. Beyond is also a great choice for mixing with Perennial Ryegrasses and Tall Fescues.

Specifications

Seeding and establishment may be done in spring or fall, but be wary of summer or winter annuals. For better early weed control, consider an application of Mesotrione in the seeding process. Plant seeds to a depth of no more than 0.25-0.50" below the soil surface to ensure good seed to soil contact. Thatch layers will only slow or impede germination success. After spreading seed, keep seedbed moist throughout germination, with extra care during the early stages to prevent seed from drying out after initial seed imbibition. Germination should begin within 10 to 21 days and be complete within 35 days. Remember, the full turfgrass establishment process may take 6 months to a year.

**CROWDS
OUT POA
ANNUA**

Maintenance

Seeding Rate:	2-3lbs/M*
Mowing (Recommendation)	2-3"
Mowing (Down to)	0.500"

*M=1,000 square feet
