

JACKLIN®

Seed Guide

2023-2024

Eight Decades and Counting

With over eighty years in the business, Jacklin continues to build upon its roots.

These eighty years have produced some of the world's most elite turf cultivars and prove Jacklin's commitment to provide the best genetics. Offering a full product line of turfgrass varieties, we have the knowledge and experience to help you achieve your goals.

Table of Contents

Kentucky Bluegrass

- 4. Elite
- 5. High-End
- 6. Mid-Range
- 6. Common

Tall Fescue

- 7. Spreading
- 7. Improved

Perennial Ryegrass

- 10. Improved

Bermudagrass and Annual Ryegrass

- 12. Bermudagrass
- 12. Annual Ryegrass

Fine Fescue

- 13. Chewings
- 13. Strong Creeper
- 14. Slender
- 14. Hard & Sheeps

KENTUCKY BLUEGRASS

Elites

After Midnight™ (*Virginia/Maryland Recommended Turfgrass list*) |

- Slow growing, compact Midnight-type with excellent uniformity and wear tolerance
- Improved shade tolerance, darker color, and Dollar Spot tolerance

Award™

- Top rated in spring density and ground cover, late fall color, and traffic and wear tolerance
- Exceptional heat tolerance

Barserati™

- Top performing in NTEP transition zone, turf quality, color, traffic, and disease resistance
- Quick to germinate with extremely aggressive establishment and very early spring green up

Beyond™

- Excellent density and aggressive traits crowd out *Poa annua*
- Scored top 10 varieties in University of Kentucky trial for Kentucky bluegrass shade tolerance

Everest™

- In North American university trials, Everest ranked near #1 against Gray and Pink Snow Mold, Leaf Spot, Anthracnose, Leaf Rust, Stem Rust, Dollar Spot, Stripe Smut, and Summer Patch.

After
Midnight

Award

Barserati

Beyond

Everest

Elites *(cont.)*

Impact™

- 25% better sod strength than other Kentucky bluegrasses in a University of Maryland study
- Resistant to Pink Snow Mold, Leaf Spot, Dollar Spot, Anthracnose, and Summer Patch

Midnight™

- Tried & true over 25 years, dense turf that withstands low heights of cut down to 0.5"
- Resists Leaf Spot and Summer Patch, and has a dark green color

NuRush™

- Statistically tied #1 for overall quality in 2019 NTEP trial data across all trial locations
- Tied #1 with a 9 rating for tolerance to Mesotrione damage at NJ2 location in 2018 data

High-End

Barimpala™

- Great quick germination at low and high temperatures
- Outstanding heat and drought tolerance with medium dark green color

Barrari™

- Highly rated in NTEP wear trials with very quick establishment
- Early spring green-up, drought tolerant, low mowing tolerance, and great disease resistance

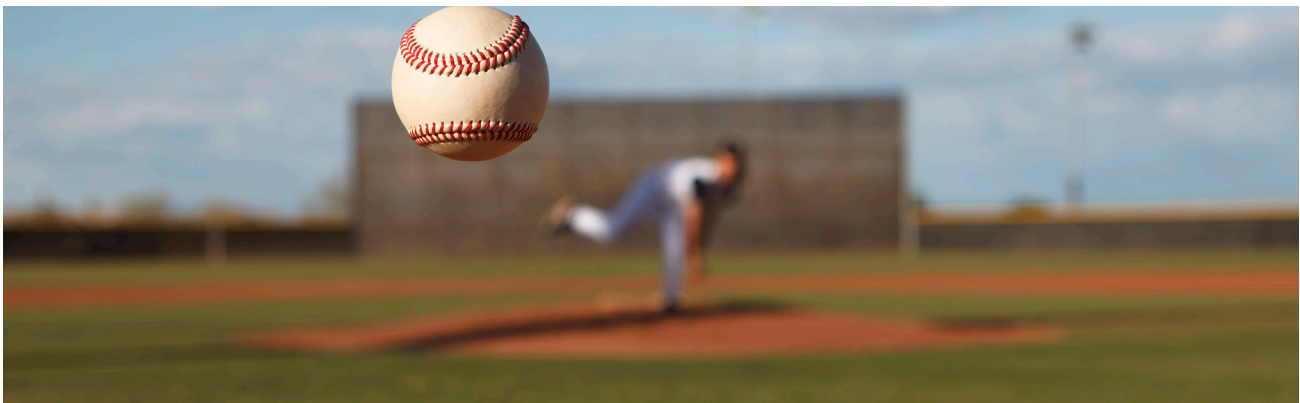

NuBlue Plus™

- Works fantastic in blends with other Kentucky bluegrasses
- Improved seedling vigor and early establishment

Rugby II™

- Ideal grass for tough, high wear sports, excels on low-mow fairways and low maintenance lawns
- Close mowing and shade tolerant, Summer Patch, Dollar Spot and Leaf Rust resistant

Kentucky Bluegrass: Mid-Range

Barduke™

- Extremely quick germination and establishment, with excellent drought tolerance
- Medium green color, high resistance to Leaf Spot, year round density, and spring green-up

Barduke

Blue Chip™

- Affordable and compliments any Jacklin blend with close mowing and disease tolerance
- Highly rated for sod strength in Nebraska sod lifting trials

Blue Chip

Jackpot™

- With ideal soil temperatures and irrigation, trials have shown germination in under 10 days
- Excellent seedling vigor and good resistance against Leaf Rust and Powdery Mildew

Jackpot

Navy™

- Medium dark color blends well with Jacklin elite blues
- Fast Establishment, early spring green-up, aggressive, Rust and Powdery Mildew resistant

Navy

Named/BVMG (Common)

Action™

- Ideal for cool season mixes with low nitrogen requirements and quick establishment
- Great spring green up, reduced top growth, good drought and traffic tolerance

Action

Baron™

- Versatile, low maintenance variety that is an excellent component for blends
- Medium green color, with good traffic tolerance, fast germination and establishment

Baron

Camas™

- Excellent disease and pest resistance
- Keeps attractive appearance even under high-stress conditions

Camas

TALL FESCUE

Spreading

Flame™

- Eliminates the need for netting in sod production with spreading trait
- Superior density, dark color, fine leaf texture

JT-783™

- Excellent disease and pest resistance
- Quick establishment and early spring greenup

Improved

Arid 3™

- Rates in the top group for resistance to pink snow mold and stem rust
- Excellent disease and pest resistance, performs under high stress conditions

Barnoble™

- Outstanding turf quality
- Fast establishment and excellent seedling vigor

BarRobusto™

- #1 turf quality in Southwest region, with high tolerance to Brown Patch
- Extremely drought tolerant with Pythium Blight resistance

Flame

JT-783

Arid 3

Barnoble

BarRobusto

Tall Fescue: Improved *(cont.)*

Barvado™

- Quick spring green-up, good traffic tolerance, and very dark green color
- Medium dwarf variety that is drought tolerant with high endophyte levels

Barvado

Bonfire™

- Fast establishment and excellent seedling vigor, leaf texture, and dark green color
- Reduced top growth, Gray Leaf Spot tolerance, Brown Patch tolerance, and seedling vigor

Bonfire

Dallas™

- Performs well under foot and vehicle traffic, fine leaf texture, and improved turf density
- Dark green color, Brown Patch resistance, improved quality, and fall color retention

Dallas

Inferno™

- Tied #1 in overall turf quality and #1 variety for summer density
- Very fine leaf texture in NTEP, #2 quality in Northeast, semi-dwarf stature, and high density

Inferno

Jaguar 4G™

- Superior quality, fine leaf texture, attractive dark green color, and reduced topgrowth
- Brown Patch resistance, dark green color, and drought tolerance

Jaguar 4G

Tall Fescue: Improved *(cont.)*

Quest™

- Out performed other cultivars in salinity trials
- Good tolerance to many common turf diseases and pests

Quest

Siesta™

- Very fine leaf texture and high density
- Less maintenance to look great with old tall fescue varieties

Siesta

Summer™

- Blends well with Jacklin Kentucky bluegrasses
- Turf density, dark green color, and reduced topgrowth

Summer

Xanadu™

- Top rated in the 2018 NTEP for drought
- Excellent NTEP quality ratings across multiple regions and management regimes

Xanadu

Zion™

- Tolerance to Brown patch (cool and warm)
- Tolerance to Gray Leaf Spot

Zion

PERENNIAL RYEGRASS

Improved

Accent II™

- Perfect choice when used alone or matched with other Jacklin grasses in mixtures and blends
- Excellent spring and summer turf density and Pythium Blight resistance

Accent II

Barlennium™

- Outstanding for overseeding applications as it rapidly forms a dense turf
- Excellent salt tolerance, dark green color, very fine leaf texture, and early spring green-up

Barlennium

Caddieshack II™

- Tied for #1 for least winter damage in Minnesota (NTEP 06-1 report)
- Pythium Blight resistance, Red Thread resistance, and Leaf Spot resistance

Caddieshack II

Infusion™

- Excellent tolerance to Gray Leaf Spot and Crown Rust
- Dark genetic color, year-round density to crowd out weeds, good traffic tolerance

Infusion

Pinnacle III™

- Works well in blends with other Jacklin Perennial ryegrasses
- Very strong overall disease resistance, including Gray Leaf Spot

Pinnacle III

Perennial Ryegrass: Improved *(cont.)*

Portfolio™

- Fast establishment and excellent seedling vigor
- Great Brown Patch tolerance

Portfolio

Premier III™

- In top statistical group for “mean turf quality” under four NTEP analytical location groups
- Consistently rated in the top statistical group in the 2010 NTEP for seedling vigor

Premier III

Revenge GLX™

- Selected for its resistance to Gray Leaf Spot, and great year-round turf density
- Brown Blight tolerance, fine leaf texture, and Brown Patch resistance

Revenge GLX

Revenge 2 GLX™

- Rated #1 Gray Leaf Spot tolerance earning it the GLX® designation
- Fast establishment and excellent seedling vigor

Revenge 2 GLX

Top Gun II™

- Can help reduce chemical costs with improved resistance to pythium blight and brown patch
- Pink Snow Mold resistance, wear tolerance, quick establishment

Top Gun II

Pinnacle™

- Smaller seed size for denser turf
- Requires less fertilizer requirements due to its natural dark green color

Pinnacle

BERMUDA AND ANNUAL RYEGRASS

Bermuda

Bargusto™

- Excellent for lawns, sports fields, fairways, and all general bermuda uses
- Early spring green up with dark green color

Bargusto

Chilly Verde™

- Adapted to wide range of soil types: pH 4.8-8.0
- Good summer turf quality with improved cold tolerance

Chilly Verde

Transcontinental™

- High summer turf quality with improved cold tolerance
- Excellent for lawns, sports fields, fairways, and all general bermuda uses

Transcontinental

Annual Ryegrass

Panterra™

- Unique non-persistent overseeding grass that makes for an easy spring transition
- Germinates at soil temps in the low 40's and is ideal for late-season over-seeding

Panterra

FINE FESCUE

Fine Fescue: Chewings

Bridgeport II™

- Excellent seedling vigor and quick establishment
- Fine leaf Chewings fescue with a dark green color with strong shade tolerance in cooler climates

J-5™

- Attractive foliage and bunchy appearance and does well in low pH soils
- Keeps color during the winter

Sandrine™

- Improved turf quality while moderately drought-tolerant in cooler climates
- Dollar Spot and Red Thread resistance

Bridgeport II

J-5

Sandrine

Fine Fescue: Strong Creeping Red

Audubon™

- Ranked #1 in spring green up and wilting in national trials
- Excellent fall color retention, outstanding resistance to various pest and disease

JF-209™

- Excellent heat stress tolerance paired with shade tolerance
- Dark genetic color turf density

Audubon

JF-209

Fine Fescue: Slender Creeping Red

Barpearl™

- Mixes well with other fine fescue species and is ideal in moderate, temperate climates
- Very quick green up in the spring and forms a very dense turf

Sprinkler™

- Good Dollar Spot and Red Thread resistance that mixes well with other fine fescue species
- Excellent for shaded areas and ideal in moderate, temperate climates

Fine Fescue: Hard & Sheep

EcoStar Plus™ Hard Fescue

- Superior turf quality compared to older generations
- Improved salt tolerance and reduced vertical growth

Marco Polo™ Sheep Fescue

- Extremely well-suited to drier, summer conditions once established
- If left unmown will develop beautiful seedheads from early to late summer

BLENDS & MIXES

Blends & Mixes

Blue Genes™: 3-Way Kentucky Bluegrass Blend

Blue Genes is a 3-way Kentucky bluegrass blend selected from elite Jacklin varieties. Developed for excellent turf quality over a broad range of environmental conditions, the varieties in Jacklin's Blue Genes mixture complement each other.

Blue Genes

Heisman™: 85/15 Kentucky Bluegrass/Perennial Ryegrass

Jacklin's Heisman Mixture is the MVP of seed blends. This combination makes for the ideal turf and research has shown that our Heisman combination of bluegrass and ryegrass produces the optimum blend of tillers in the maturing turf.

Heisman

Overseeder II™: 70/30 Kentucky Bluegrass/Perennial Ryegrass

Jacklin's Overseeder II Mixture is designed for the renovation of turf areas subjected to damage from diseases such as necrotic ringspot, summer patch, *Poa annua* infestation or heavy traffic.

Overseeder II

Athletic Pro II™: 50/50 Kentucky Bluegrass/Perennial Ryegrass

Athletic Pro II is a Jacklin quality mixture of 50% new generation perennial ryegrasses (*Lolium perenne*) and 50% Kentucky bluegrasses (*Poa pratensis*). It is tailored to athletic fields, playgrounds, golf course roughs, or other high traffic areas that receive less-than optimal care.

Athletic Pro II

NoNet™: Spreading Tall Fescue Blend

Make way for Jacklin's NoNet spreading tall fescue (*Festuca arundinacea*). NoNet was developed to insure that its spreading trait reaches the end user along with the improved turf characteristics you expect from a Jacklin variety.

NoNet

Blends & Mixes *(cont.)*

A-Plus™: 90/10 Tall Fescue/Kentucky Bluegrass

A-Plus is a Jacklin quality mixture of new generation tall fescues (*Festuca arundinacea*) and Kentucky bluegrass (*Poa pratensis*). It provides all of the outstanding characteristics of our Triple-A 100% tall fescue blend with a “plus” of improved sod-forming characteristics and recuperative potential by adding Jacklin Kentucky bluegrass.

A-Plus

Triple A™: 3-Way Tall Fescue Blend

Triple A turf-type tall fescue blend performs well in a broad range of climates and conditions. The varieties used in Triple A have an attractive, dark green color and improved leaf texture, which makes this blend an excellent choice for a broad range of turf applications.

Triple A

Med Gold™: 3-Way Perennial Ryegrass Blend

Jacklin’s Med Gold perennial ryegrass blend combines Jacklin’s best perennial ryegrass (*Lolium perenne*). The varieties selected for this blend show improved seedling vigor and exhibit overall tolerances of common diseases and pests in turf.

Med Gold

Top Flight™: Perennial Ryegrass Blend

Top Flight is a specially designed blend of perennial ryegrasses created solely for the warm-season overseed market. Top Flight creates a lush green turf that is excellent for golf courses, parks, sports fields, and home lawns.

Top Flight

SPECIALTY GRASSES

Fults™ Alkaligrass

- Ideal for golf fairways and rough mixtures or landscape areas with saline and high pH native soils
- Adds “salt insurance” to mixtures where de-icing salts are used

Fults

Havana™ Poa Trivialis

- Improved variety developed for fall and winter overseeding of Bermuda
- Rapid germination for overseeding dormant bermudagrass

Havana

Contractor's Mix™

- Fast germination and establishment
- Can germinate in cold temperatures

Contractor's Mix
